How Buyers and Sellers Are Navigating in Today's Market

Buyers and sellers have changed what they want in a home, and how to use their home, how they search for a new home and the relationship to the agent. The housing market has roared over the last year, but now shows signs of normalization. Buyers have struggles to find the perfect home and found creative ways to enter the market. Demographics have shifts and many potential buyers have been left out. How is everyone coping and what come next? Don't miss out on this presentation.
